

The New Face of MAPICS

PowerLink Workbenches

What do they do and how can they help me?

John Grindley

John.Grindley@cistech.net

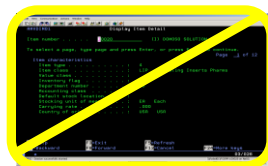

The New Face of MAPICS

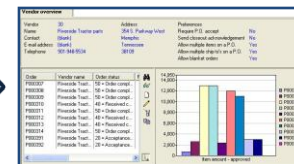

Agenda for Today

- Power Link Workbench
 - What is it, what does it do.
 - Considerations in developing a workbench
 - Preference Setting
 - Broadcast vs. Receive
 - Steps in creating a workbench

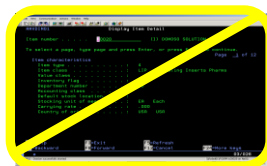

The New Face of MAPICS

Workbench

LINKS MULTIPLE WINDOWS TOGETHER TO PERFORM

- **A SET TASK**
- **SIMULTANEOUS INQUIRY OF INFORMATION ACROSS MULTIPLE APPLICATIONS**
- **QUICK AND EASY ACCESS TO INFORMATION**
- **STANDARDIZATION OF WORK**

The New Face of MAPICS

WORKBENCH – 4 Windows linked together

The New Face of MAPICS

Workbench Function

For all of the windows in a workbench, the workbench function retains:

- The size and position of each window on your desktop.
- The selected card in the card file, for any windows that contain card files.
- The view, subset, and sort applied to a list, for any windows that contain list windows.

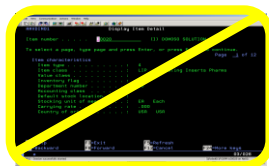

The New Face of MAPICS

Considerations in Developing Workbench

- What Task is to be accomplished
- What Data needs to be viewed
- What Objects need to be linked
- Do Views or Cards have to be Changed to provide correct information.
- Private or Public Security

The New Face of MAPICS

SETTING PREFERENCES- Steps in Developing Workbenches

1) Remove Check box to Broadcast objects: Triggers Activation

2) Move Objects to Broadcast Side

The screenshots illustrate the process of configuring the (78) Item Revision Preferences dialog box. The first screenshot shows the 'Use public preference' checkbox checked. The second screenshot shows the checkbox unchecked and the 'Broadcast' list populated with various objects. The third screenshot shows the 'Broadcast' list populated with the same objects, and the 'Do not broadcast' list is empty.
